

Bore Crew Foreman

Job Description

The Underground Utility Foreman will run a small crew of 4 to 6 people installing fiber optic cable in the right of way (R.O.W.) utilizing directional boring equipment (Ditch Witch for example) and excavating equipment, as well as other miscellaneous machinery (jackhammers, masonry saws, shovels, hydro excavating, etc.), used to locate utility lines (Gas lines, water lines, communication cables, etc.) to avoid damages by using the boring machine. When directional boring isn't required for a project, installing inner duct & fiber optic cable within telecommunication manholes is to be used. The foreman will also ensure industry safety procedures are followed and will verify all vehicles & equipment are operational & in good standing. Foreman will be required to track all work completed each day and submit all required paperwork at the end of each working day.

Pay will be based on experience within the industry. Full benefits and 401k after 60 days of employment.

Qualifications

Qualifications include Horizontal Directional Drilling (HDD) experience, Excavator & Heavy Machinery experience, Basic Blueprint Reading Skills, Ability to Lift at Least 100 lbs, a valid Driver's License, and the passing of a Background Investigation and Drug Screen. Willing to travel with the possibility of relocation.

Other Requirements

Preferred and beneficial experience include Fiber Optic Cable Pulling and Inner Duct installation experience, Survey experience, Utility Locating, Traffic Control experience, and Manhole & Confined Spaces experience.
